

AKASH BALKRISHNA MATALE

Full-Stack Web Developer (Laravel/Vue.js/ReactJs/ExpressJs)

+91- 7977862737 | 8108596770 @ akashb.m786@gmail.com Thane , Maharashtra

SUMMARY

Full-Stack Web Developer with **5+ years of experience** in designing and building scalable web applications. Proficient in **Laravel, Vue.js, React.js, and Express.js**, with a strong focus on **real-time project management systems and digital asset transaction platforms**. Skilled in developing **secure, user-centric, and performance-optimized solutions**. Adept at collaborating in dynamic environments, driving innovation, and leveraging modern technologies to deliver **seamless user experiences**.

SKILLS

Vue.js	React.js	Next.js	HTML5	CSS3	JS	jQuery	AJAX	JSON	Bootstrap4
Laravel	Node.js	Express.js	PHP	MySQL	Redis				
Docker	AWS EC2	Git	Bit-Bucket	CI/CD	Jira				
Web3.js	Ether.js	Crypto Wallets	Smart Contracts	Solidity	DeFi				
API Integration	Encryption (AES-256)	Microservices	MVC	Banking	Fin-Tech				

EXPERIENCE

02/2025	Software Engineer
Mumbai, India	Veefin Solutions Pvt Veefin Solutions Ltd. is a leading provider of financial products and digital solutions , specializing in Loan Management Systems (LMS) and Loan Origination Systems (LOS)
04/2024 - 12/2024	Software Developer
Zug, Switzerland	OneG8 A blockchain-based social media and crypto wallet platform supporting multiple networks, designed for secure communication, media sharing, and digital asset management.
07/2020 - 03/2024	Full-Stack Web Developer
Navi Mumbai	XANAX Technology A real-time crypto-related product company <ul style="list-style-type: none">Developed real-time crypto-related products using Laravel and Vue.jsWorked in a team focused on digital asset management and API integration
12/2019 - 06/2020	Laravel Trainee
Mumbai	Abhay Tech Solution Product-based company <ul style="list-style-type: none">Assisted in full-stack development and exposure to various tech stacks

KEY ACHIEVEMENTS

 Project Achievements Successfully delivered project integrations that improved user engagement and transaction security	 Encryption Designed and developed a secure encryption module in Vue.js to encrypt messages and media using a public key and IV, with decryption handled on both frontend and backend via private key. Ensured military-grade, dual-layer security by storing encrypted data in the backend and enabling seamless real-time communication.
--	--

CERTIFICATIONS & COURSES

AI Learning Course (2025) – be10x

Completed hands-on training in **AI tools, automation, and prompt engineering**, with real-world use cases in **ChatGPT/OpenAI API integrations**.

EDUCATION

04/2019 - 05/2019

Mumbai

BSC Computer Science

Mumbai University

PROJECTS

Loan Management System (LMS) – Multiple Clients (JIO | LULU)

📅 2025 - Present

Developed and enhanced a **comprehensive Loan Management System** for **JIO**, streamlining the loan lifecycle from origination to settlement.

- Implemented **flexible loan modules** including Bullet Loans, Term Loans, Line of Credit (LOC), and Custom Loan Schemes.
- Automated loan workflows, reducing processing time by 35% and manual errors by 60%
- Built a **batch monitoring system** to automate Cron jobs and track execution with real-time success/failure logs.
- Delivered a **scalable architecture** using Laravel, MySQL, and Docker with AWS EC2 deployment.
- Ensured data security using **AES-256 encryption** and implemented a **fully automated, reusable code structure** with modular functions to improve scalability and maintainability.
- Developed **multi-role access dashboards** for Admin, Finance Teams, and Customers.

Loan Origination System (LOS) – Multiple Clients (IndusInd Bank, UCO Bank, L&T Finance, Jio)

📅 2024 - Present

Developed and implemented a **Loan Origination System (LOS)** to streamline the **end-to-end loan application, approval, and disbursement process** for multiple enterprise clients in the **banking and finance sector**.

- Automated **loan onboarding and credit assessment workflows**, reducing manual intervention and processing time.
- Integrated **KYC verification, document management, and credit scoring modules** for compliance and risk management.
- Delivered **scalable architecture** using Laravel, MySQL, Docker, AWS EC2, and Microservices for high availability.
- Successfully deployed for **leading financial institutions** including *IndusInd Bank, UCO Bank, L&T Finance, Central Bank of India, and Jio, Bank of Baroda, Indian Overseas Bank.*

Digital Crypto Web3 Wallet

📅 2024

A **multi-chain Web3 crypto wallet** designed to support **secure transactions, token management, and decentralized storage** across multiple blockchain networks.

- Built **multi-network wallet support** (Ethereum, Bitcoin, BSC, Polygon, and custom chains) with real-time transaction tracking.
- Implemented **QR-based crypto transfers**, public/private key management, and **mnemonic phrase import/export** for enhanced security.
- Optimized backend with **NodeJs/Express & MySQL** for faster query performance.
- secured 2k+ wallets \$ 1000+ transeactions

Sirius Sync

📅 05/2023 - 02/2024

An **advanced social media platform** with integrated **reward system and crypto wallet**, enabling users to earn digital assets through daily engagement and activities.

- Integrated **crypto wallet features** for storing, sending, and receiving tokens securely.
- Built scalable APIs with Laravel, supporting 50k+ daily requests with <200ms latency

Atromg8 Eco-system

📅 08/2020 - 01/2022

A **blockchain-powered social media and e-commerce ecosystem** integrating multiple modules such as **News, NFT marketplace, Crowdfunding, Charity, Messenger, Video/Audio Calls, and Crypto Wallets**.

- Developed **frontend modules with Vue.js** and **backend APIs with Laravel MVC**, ensuring seamless integration across services.
- Built and optimized **social media features** (messaging, company pages, media uploads, and interactions).
- Enhanced **e-commerce functionalities** with product listings, payment gateways.
- increased user engagement by 25%

Tripload Logistic

📅 11/2019 - 01/2020

A **real-time product shipping and tracking platform** with **multi-role access (Admin, Super Admin, Vendor, User)**.

- Implemented **multi-login system** for different user types ensuring secure and scalable access.
- Built core **logistics management modules** to streamline product shipping operations.
- Optimized backend queries, improving API response time by 30%

REXY CLUB

📅 02/2022 - 04/2022

An **NFT marketplace** built on **blockchain and EVM-based transactions**, enabling users to buy, sell, and trade digital assets securely.

- Integrated **secure blockchain transactions** with EVM-based smart contracts.
- Optimized **frontend experience** with Vue.js and backend APIs using Laravel for seamless performance.
